Hi Beth, sorry I’m a bit unclear on this. The versions I sent you were the files we send to the different journals. The only formatting they have is the format required for submission but they are written in latex so that’s where the format comes from – it isn’t applied by the journal (however we often are required to utilise templates for submission, so the writing of the paper is usually done within these). I don’t think I would have them (or access to them) in any other format.

Cheers,
Simon

Hi Simon,

Thanks for your email. We are seeking the post-prints (accepted manuscripts) which shouldn’t have any formatting supplied by the publisher.

Kind regards,

Beth Glynn
