## A corrigendum on

### Does a Combination of Virtual Reality, Neuromodulation and Neuroimaging Provide a Comprehensive Platform for Neurorehabilitation? – A Narrative Review of the Literature

by Teo, W.-P., Muthalib, M., Yamin, S., Hendy, A. M., Bramstedt, K., Kotsopoulos, E., et al., (2016). *Front. Hum. Neurosci.* 10:284. doi: 10.3389/fnhum.2016.00284

In the original article, there was a mistake in the legend for Figure 2 as published. The correct legend appears below. The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way.

**Figure 2. Stroke participants engaged in VR therapy using an X-Box Kinect motion capture system, MediMoov by NaturalPad, while receiving tDCS.**

**Conflict of Interest Statement:** The authors declare that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.
