Abstract

EduSummIT is a global community of policy-makers, researchers, and educators working together to move education into the digital age and to contribute to sustainable answers to the challenges facing education. Previous EDUsummIT conferences (The Hague 2009; Paris 2011) have led to position papers, journal articles, conference presentations, international working group meetings, and white-papers aimed to assist people who are working for transformative change in education powered by technology. In this symposium we share major themes discussed in the EDUsummIT community: 21st century learning, student technology experiences, teacher learning of IT, restructuring schooling with digital technologies, IT-supported assessment and research on IT in education. More information about the EDUsummIT can be found on www.edusummit.nl.

Keywords

21st century learning, student technology experiences, restructuring schooling, teacher professional development, IT supported assessment, IT research, digital technologies
