Dear author of eCAADe 2012,

We have received 312 submissions, which shows the high level of interest in the 30th International eCAADe 2012 Conference. Thank you for your submission to the conference.

Because of the large number of submissions, we have decided to introduce three parallel tracks in the conference, so that we can accept 170 papers. Nevertheless, this still means we have to reject 142 abstracts. The level of submissions was high, so even some good abstracts had to be rejected unfortunately.

We are pleased to let you know that your submission, ID: 91, title: Sensory Morphing Skin

has been accepted for the eCAADe 2012 conference.

The reviewer comments are included at the bottom of this email.

Please note the following:

- 1) Send us a confirmation (including your name and ID) that you will submit a full paper and attend the conference.
- 2) The registration and accommodation information will be online next week.

We are looking forward to receive your contribution to the conference and welcome you to Prague.

Kind regards,

Henri Achten and Dana Matejovska

=====

Reviewer recommendation:

Clear Accept: Content, presentation, and writing meet professional norms; improvements may be advisable but acceptable as is

Reviewer comments:

-clarify the distinction between research of others, you base your work on/compare to- and 'your' research -besides general intro, some initial classification and clarification theoretical subchapter should be developed

- incorporating the subchapters "Sensory.." and "Responsive.." -this chapter should be followed by clear reaserch outline: methods&materials, results, discussion

=====

Reviewer recommendation:

Clear Accept: Content, presentation, and writing meet professional norms; improvements may be advisable but acceptable as is

Reviewer comments:

In the abstract an interesting approach to interactive facades is presented. The subject is very suitable for the conference theme.

=====

Reviewer recommendation:

Clear Accept: Content, presentation, and writing meet professional norms; improvements may be advisable but acceptable as is

Reviewer comments:

Check english wording and orthography. Although it is done often, the parallel between the human skin and a building envelope/skin is in fact far from evident. Author(s) have a very 'personal' interpretation of soft response, meaning without mechanical devises.
