TYPE "C"

Size 4' long by 1' 6" wide. Bowl
size 13" x 13" x 6½" deep.

DOUBLE BOWL
TYPE "D"

Size 6' long by 1' 6" wide. Bowl
sizes 18" x 13" and 13" x 13" x 6½"
deep.

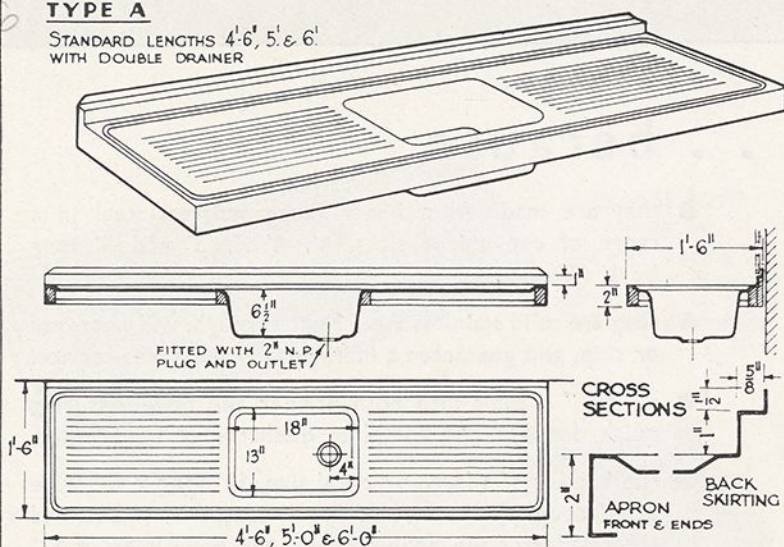

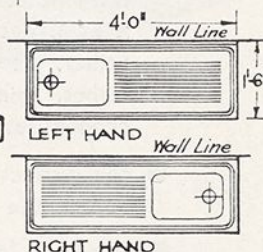

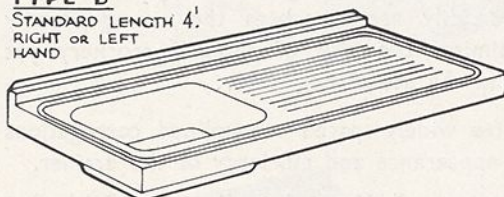

. . . . because

- they are made from heavy gauge stainless steel in a range of convenient sizes, 4', 4' 6", 5' and 6' long by 1' 6" wide.
- they are solid stainless steel right through, will not wear or chip, and guarantee a lifetime of trouble free service.
- a "fall" is built into both drainer and bowl, ensuring quick drainage and complete discharge of used water.
- the bowl is of a large practical size, 18" long x 13" wide x 6½" deep (in the case of the 4' centre bowl unit and the smaller of the double bowls, the bowl is 13" x 13" x 6½"), designed with sloping sides to give maximum utility. It readily accommodates the average family dishes, minimises the risk of chipped crockery yet economises in the use of hot water.
- the distinctive widely spaced streamlined corrugations add to the appearance and efficiency of the drainer.
- the units feature a "Wunderbrite" surface finish that is smooth and lustrous, does not afford a foothold for dirt or grease, and is easily kept clean and sparkling without the use of abrasives. Use a soft cloth, warm water and soap, and a cleaning powder guaranteed not to scratch.
- being securely and rigidly backed with timber, they are extremely economical to instal in new or old homes, for when placed over cupboarding special timber framing is unnecessary. For those who prefer unbacked units, 4', 4' 6" and 5' centre bowl type are available without timber backing.
- once in position, a Wunderlich Sink Unit brightens the appearance of the kitchen and lightens the drudgery of the recurring task of washing dishes.

A WUNDERLICH Stainless Steel SINK UNIT
will add beauty and utility to your kitchen
