"A colourful mottled (Asbestos Cement) Sheeting for interior walls and partitions."

WUNDERLICH
DURACHROME

COLOURFUL GLISTENING WALLS

DURACHROME is a highly-glazed, colourful sheeting of lasting beauty and real economy. The colourful surface is prepared from a patented formula applied in a variety of finishes, including Golden Beryl, Mottled, and Green Mottled.

DURACHROME Sheets are supplied ready for direct application for all modern interior wall or partition treatments to Bathrooms, Kitchens, Entrance Halls, Bar and Lounge Rooms, Foyers, Counter Fronts, Shops, or wherever a hygienic finish is desired. The decorated surface will not craze, stain or absorb dirt, grime or moisture.

Once installed, Durachrome needs little attention. An occasional wiping over with a soft cloth and soap and water will keep the finish spotless. Abrasives or patent cleaners should not be applied, but a pure wax medium may be used to maintain the polished finish.

DURACHROME is essentially a sheeting for interior wall treatments; it is not suitable neither is it recommended for exterior application.

DURACHROME is light in weight and transports compactly, thus enabling country clients to secure their requirements at moderate cost.

DURACHROME

IS EASY TO FIX

Any tradesman using ordinary carpenters' tools can apply DURACHROME easily and quickly. It can be fixed to either wood battens, timber studs or to plugged brick, concrete or stone walls.

Note.—When Durachrome is fixed behind Baths, Basins, Sinks, Draining Boards, etc., where moisture is likely to be constantly present, seal the bottom edge by setting in a plastic compound, such as "Vulcatex." Force the edge down into the compound so that some of the mixture is squeezed behind the sheet.

DURACHROME is available in large rigid panels, approximately 3/16" thick, in sizes 6' x 3', 6' x 4', 8' x 3', 8' x 4'.

Price, 7/9 per sq. yard.

Standard accessories, finished Black with White markings, are available in lengths of 6' and 8'. They can also be supplied to order in colours to match the standard sheets.

Cover Batten, 2" wide	4d.	lin. ft.
3"	4½d.	" "
Top Capping Mold, 3" wide	7½d.	" "
Internal Angle	8d.	" "
External	8d.	" "
Skirting—(6" x ½")	8d.	" "

These exclusive accessories ensure simplicity of fixing; the rounded edges prevent the accumulation of dirt.

Nickel-plated Screws and Washers:

1" and 1½"	6/6 gross	1¾"	8/6 gross
1½"	7/6	Washers	1/9

All prices Free of Sales Tax. Cartage, Packing and Cutting extra.
